

key points

Guidelines for Highlighting Wegic's Features:

1. **Ease of Creation and Management:** Focus on how simple it is to create and manage a website using Wegic. Show the process of building a website through simple chats with Wegic's AI—emphasize how quick and effortless it is.
2. **Feature Highlights:**
 - **Web Design & Development:** Mention a standout feature like **Circle to Edit**, which allows users to make visual changes to their website easily.
 - **Web Management:** Highlight how Wegic handles website updates and maintenance for you, especially empowered by **Smart Update feature**, which keeps your site updated automatically with just a source link. Showcase the **Automatic Adaptation** feature, which ensures the website looks great on any screen size or device.
3. **One-Click Publication:** Don't forget to mention that with just one click, users can publish their website instantly, saving them time and effort.

Target Audience: In short, the main users of our product are small and medium-sized business owners and entrepreneurs. Most of them have a limited budget, no programming or design knowledge, no management time and energy, and are looking for a product that can meet their website building and managing requirements quickly and effortlessly. Therefore, it should be very attractive to them that Wegic can create a beautiful but simple website in minutes without the need for coding and manage the website automatically and intelligently without any manpower devoted.
